# What is Vandal-Proof?

- Vandal-Proof means housing is sturdy and robust, that can resist attack from vandalism.

# Why Vandal-Proof is Needed?

❖ Security installation of IP cameras are frequently used in places that suffer from vandalism. However cameras themselves usually become targets of vandalism. Therefore it's necessary for Vandal Resistant of IP cameras.

# Why Vandal-Proof is Needed?

❖ The Vandal-Proof IP camera is suitable for placement in areas where camera may be subject to tampering or vandalized.

# The Advantage of Vandal-Proof Camera

❖ The housing of Vandal-Proof protects cameras from damages caused by vandalism or harsh conditions and environments, thereby ensuring constant operation. The Vandal-Proof camera is identical in functionality and features to the standard camera.

# Certification of Vandal-Proof

- If Vandal-Proof camera is set on railway applications. Certification EN 50155 is needed as well.
